

UHF Security Gate

Model : USG-T1

The **UHF Security Gate** is and the new first of its kind aesthetically designed theft prevention gates. The UHF Security Gate feature a Light Diffusion Acrylic design that can be lit up to display various different colors and combinations and has both the visual and audio alarms. In its field of coverage, the UHF Security Gate can detect tagged library assets of up to 3 meters in most orientations and holding behaviors. The built in sensors and controllers make the UHF Security Gate a truly intelligent theft prevention measure. Let the Security Gate safeguard your library assets.

SPECIFICATIONS

Operating Frequency	: UHF 920-925 MHz (Thailand) ISO 18000-6C, EPC Class1 Gen 2
RFID Tag Compatibility	: UHF 860-960 MHz , ISO 18000-6C , EPC Class1 Gen 2
Material	: PVC and Acrylic
Alarm Indicator	: Visual and Audio Alarm
Communication	: TCP / IP or USB
Detection Orientation	: Horizontal, Vertical, Diagonal (3D dimensional)
Detection Range	: up to 3 meters (factors dependence)
Communication	: TCP/IP or USB
Input Power	: 230-240 V
Compliance	: FCC / CE / EN / ESTI / NBTC

FEATURES

- Orientation-insensitive library asset read zone
- Multiple library assets processing capability
- Long range detection for up to 3 meters
- Visual and Audio theft preventive alarms
- Movement Directional and counter sensors
- Controllable RGB LED lighting
- Stand alone operation during back-out
- Real time monitoring and report generation
- Connectivity with LMS via SIP2 Protocol
- Library assets, Books, TAPE, CD/DVD, VIDEO Cassette will not being damaged during passing gate

FEATURES

- Integration with CCTV Surveillance System
- Integration with Flap Gate
- Custom Sticker
